Building success with the business telephone leader

The small business world needs more: more productivity, more information, more time, more service, more solutions, more flexibility and more value.

Introducing the Model 480e by Aastra Telecom. Loaded with features designed to give you more – more telecommunication power than ever before.

With a large backlit display screen and six "softkeys" that provide different options based on activity, the Model 480e provides step-by-step instructions and menus for ease of use. Both the screen and multi-function indicator light are designed to provide more information with less effort.

Need to know who's calling while you are on line? The Model 480e provides one touch access to popular network features such as Call Waiting ID, Three-way calling and Call Forwarding. No need to try and remember special codes or find lists.

Want to keep a list of your customers close at hand? With its large easy to read display and 200 name and number directory, the Model 480e provides "at a glance" dialing information from your directory or callers list. Or, using our Web Configurator tool, label and program the on screen softkeys as one touch dialers for those you call frequently.

Making and receiving more calls than ever? Improve your productivity using the built in handsfree speakerphone or plug in a headset for privacy while on the phone. The Model 480e will work seamlessly with both 2.5mm and RJ22 jacked headsets and can be programmed to offer headset/ handsfree options for call handling.

All these features and more, plus the quality and reliability you would expect in a business telephone, in a compact design that takes up less desk space.

The Model 480e – the "more" tool for small business.
